Election/Restrictions

1. This is a restriction in response to the present US Application filed on 11 January 2006. **Claims 1-55, 58-63** are presented for examination before restriction. Claims 56-57 were never presented for examination. None of the claims is amended.

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered **claims 58-63** have been renumbered **56-61**.

2. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1: claims 1-31, 42-43, drawn to routing messages through an IP Multimedia System, IMS, Fig. 2.

Group 2: claims 32-41, drawn to converting a message received in accordance to a first protocol to a second protocol and then sending the message, Fig. 5.

Group 3: claims 44-55, drawn to providing network services to a subscriber using a subscriber's database, Fig. 6.

Group 4: claims 56-61 drawn to optimizing a call session control function using an outbound proxy function, Fig. 3.

3. A telephone call was made to Douglas H. Goldhush on 5/2/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
